- This step adds the modifier option to the modifier grid of the product. In this example, we have added the modifier to the *Roll Sign Print* product.
- The final part of this setup is editing the Product Layout in Control.

- 5) Editing the Layout Code
 - a. Locate the Product(s) that you have applied the modifier to.
 - Setup\Pricing Setup\All Pricing Setup\
 - Select *Edit*
 - b. Click on the Advanced Tab and Select Pricing Forms and Product Layouts
 - c. Select the middle option *Layouts Used for Invoice/Estimates* and select *Edit Product Layout.*

• This will open the layout code

- 6) Editing the code
 - a. Select Edit
 - b. Scroll to the very top of the Code
 - c. Place your curser on the first green "H" and hit Enter. This will create a line for you to insert the code:
 - d. In the space created copy and paste (or carefully type) the following:
 - if modifiervalue("Hide") <>1 then
 - e. Scroll down to the very end of the code and paste (or carefully type) the following:
 - else "" endif
 - f. Click Save
